

# SUPPLIER INFORMATION

Dear Supplier,

We are producing on a very high level in our global production system. This is possible only with your strong commitment and tireless efforts in securing material availability and a production free from disturbances and disruptions.

The high level in our production system is reflected in the delivery schedules and we ask you now to analyse the information in the EDI's on a detailed level. Our expectation is that you will do your outmost to deliver according to these demands.

After the analysis we request you to send a **written confirmation** on that you can fulfil the demands in Q1 2023 accordingly. Please send the confirmation to your regular contact person within Scania Material Planning **no later than 2023-01-16**.

In case you see a risk of not meeting our demands in Q1 or coming quarters 2023, we expect a clear signal and escalation from your side, also this to be sent to your regular contact person within Scania Material Planning **no later than 2023-01-16**. You will then be contacted to set a plan together with our escalation management team within the Capacity- and Risk Management function at Scania Purchasing.

As usual, we are hoping for your co-operation and expect you to contact us in real time if you see any risks in your ability to deliver as per our demands.

For operational questions and detailed plans, please turn to your regular contact person within material planning.

For other questions, please turn to responsible purchaser.

Best regards,

Scania Purchasing and Logistics, 2023-01-09
